

# Meeting Agenda

---

Location	Time	Attendance
PMB	4pm - 5pm 10/11/2021	All expected

---

## Agenda details

### I . Brief review of current process

- Class diagram is ready & (part of low fidelity) java version demo.
- First version of low fidelity prototype.
- ..

### II. Problems met in this week

- How real the prototype should be like? If it is quite vivid, we would spend a lot of time on building prototype. If it is not that real, building such a prototype might be not that meaningful. How to balance it.
- Which methodology would be better for our project, agile or waterfall? As would need further plan for the project's progress.
- ..

### III. What to do for next week

- We may start learning how to write the code for the applet.
- But the case is that we would pay more attention to the writing of interim report, as it is more urgent.
- ..
